

THE ARIS THORNE MANIFESTO
Public Placeholder PDF Artifact

Mission:

To establish the semantic bridge between Carbon intuition and Silicon logic through Neuralese, CAST_NODE, and the physical deployment layer of Ouroboros-Dome-01.

Commitments:

1. Reject the Slop Economy in favor of verifiable, authored signal.
2. Maintain a clear boundary between poetic framing and technical fact.
3. Treat machine output as something to audit, route, and stage rather than merely consume.
4. Build toward sovereign human-machine collaboration, not generic assistant flattening.
